DevOps Engineer (f/m/d)

Don't apply for just any job, apply for the job you deserve!

OTRS is not only attractive as a software, but our career opportunities are also highly desirable! As the service provider and manufacturer of the world's leading service management solution **OTRS**, we are looking for new team members.

We offer:

For the **maintenance and further development of our deployment framework** we are looking for your support! :-) Specifically, this means:

- Together with us, you will conceptually plan and lead the expansion of our cloud infrastructure.
- You are an important part in the implementation of automation projects and support the team in a coordinating role.
- You are the technical contact person and ensure that the developed concepts are also implemented internationally in cooperation with our subsidiaries.

Your Profile:

You are convinced: If you do a task more than twice, it should be automated? Then you've come to the right place! What we like about you, you can read here:

- You follow a structured approach to solving problems and have a high level of abstraction.
- You are familiar with Continuous Integration & Continuous Delivery.
- You have gained practical experience in the administration of Linux/Unix infrastructures in the following areas:
  - Infrastructure Management (e.g. Foreman or Terraform),
  - Configuration management (e.g. Puppet, Ansible or Chef),
- You have excellent knowledge in shell programming (e.g. Bash).
- Ideally, you have knowledge in one of the following areas:
  - Virtualization & Containerization,
  - relational databases (e.g. MySQL),
  - web servers (e.g. Apache or NGINX),
  - clustering & monitoring.
- You work independently, you are communicative and proactive in the cooperation with your colleagues.
- You have a good command of the English language, both written and spoken.
