And, hey! This isn't just for IT teams. Other teams can use ITIL® concepts to bring business process automation (BPA) and added customer value to their organizations.

They've already started automating their business processes...

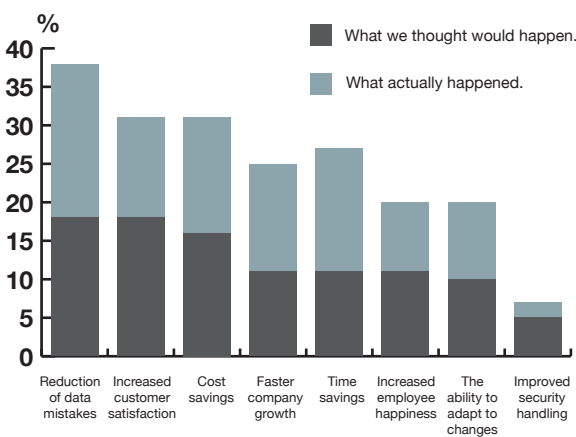

... and actively engaging their people in continuous process improvement.

But is it really worth all that effort?

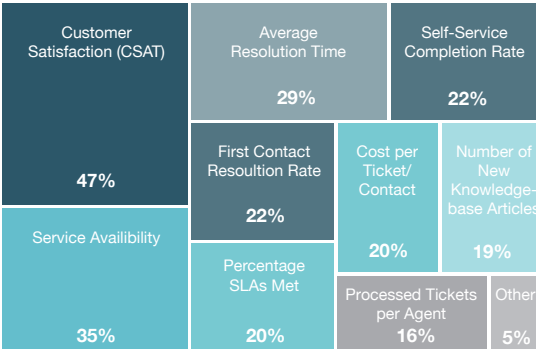

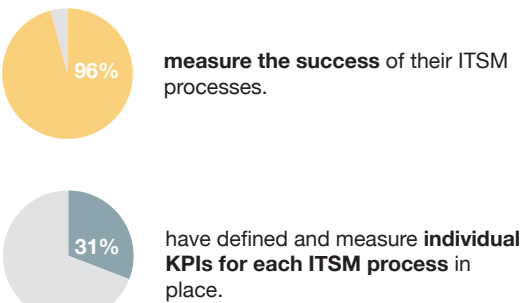

Expected vs. actual primary benefits of BPA:

Fair enough, but can we also measure this, you ask? Sure thing! For every process, there's a KPI that suits your requirements.

CSAT and service availability are the most popular KPIs. But wait, there are more!
